When faced with critical litigation issues, experience matters. We have gained practical experience from having completed more than 175,000 investigations. Clients rely on us to provide expert assistance for resolving claims and disputes arising from faulty design and construction, materials failures, water leakage, and accidents.

Our professionals provide expert testimony, effectively conveying complex technical concepts in mediations, depositions, and trials. Our experts offer opinions based on state-of-the-art investigation and practical knowledge in all areas of construction technology. We are prepared to consult on standard of care, property damage, causation, code compliance, required repairs, and construction defects.
