#### EXPERIENCE

Since joining WJE in 2008, Jessica Alzate has been involved in various architectural preservation and repair projects. Ms. Alzate's experience includes facade condition surveys, repair design, construction document preparation, and construction observation for buildings varying from large institutional buildings to single-family residences. Her expertise also includes documentation and investigation of building facades, with a focus on brick, terra cotta, and stone masonry, as well as preservation and repair of historic buildings.

In addition to her experience with building facades, Ms. Alzate has also participated in roofing and waterproofing projects, including plaza replacement efforts.

#### REPRESENTATIVE PROJECTS
