EXPERIENCE

Grace Becker works on many projects involving new and existing building enclosures. Her work includes repair and rehabilitation design, waterproofing design, condition evaluation, new design and design-assist work, and construction observation services.

Ms. Becker possesses experience in the major aspects of project delivery, including initial investigation, conceptual or repair design, construction document preparation, and construction contract administration. Her focus ranges from evaluating design ideas for new construction to designing solutions for repairs and rehabilitations.

Before joining WJE in 2023, Ms. Becker was an architectural designer with project experience spanning both the private and public sectors. Her previous work included designing and renovating various commercial project types, including office buildings, retail spaces, recreation areas, and financial and industrial buildings.
