EXPERIENCE

William Waterston has extensive experience in roofing and waterproofing products and systems, including the investigation, evaluation, and design. He is also experienced in construction document preparation and specification writing as well as facade assessment. Mr. Waterston collaborates with other specialists inside WJE to deliver building enclosure commissioning services focused on systems integration.

As a registered architect and a registered roof consultant, Mr. Waterston has broad-based experience in architecture and roofing systems that provide him with a unique perspective on problem solving for waterproofing and roofing challenges on new and existing buildings.

Mr. Waterston has authored several articles on roofing material choices and roofing practices and has presented at Build Boston, International Institute of Building Enclosure Consultants, and Construction Specifications Institute meetings and symposia.
